

METHOD AND ARRANGEMENT OF GRAMMAR FILES IN A PRESENTATION LIST

ABSTRACT

A method (10) of arranging grammar files in a presentation list such as a drop-down list can include the steps of receiving (12) a system request to display the grammar files in the presentation list, and sorting (14) the grammar files by giving user defined grammar files greater priority over built-in grammar files and then sorting by a second criteria. The method can further include the step of displaying (16) the grammar files when a user selects the grammar files and distinguishing between a user defined grammar and a built-in grammar.
